These are tables for which hundreds have doubtless sought in vain, to wit, *Accurate* Tables, in such form that they may be laid open on the desk, and so arranged as to be readily consulted by the eye, without calling for the use of hands and mind to turn over pages and pick out of battalions of figures the interest required.

Reference is made to the section of the 10 per cent. Table and examples below.

	1000	2000	3000	4000	5000	6000	7000	8000	9000
27—	750.	1500.	2250.	3000.	3750.	4500.	5250.	6000.	6750.
28—	777.8	1555.6	2333.3	3111.1	3888.9	4666.7	5444.4	6222 2	7000.
	1000	2000	3000	4000	5000	6000	7000	8000	9000
29—	805.6	1611.1	2416.7	3222.2	4027.8	4833.3	5638.9	6444 4	7250.
Months	1000	2000	3000	4000	5000	6000	7000	8000	9000
1—	833.3	1666.7	2500.	3333.3	4166.7	5000.	5833.3	6666.7	7500.
2—	1666.7	3333.3	5000.	6666.7	8333.3	10000.	11666.7	13333.3	15000.

EXAMPLE 1.—What is the interest on **$6754** for **27** days at **10** per cent?

Opposite **27** and under **6000** find **4500.**
700 **525.**
50 **37.5**
4 **3.**
$50.65.5

EXAMPLE 2.—What is the interest on **$5000** for **1** month **29** days at **10** per cent?

Opposite **1** month and under **5000** find **4166.7**
29 days **5000** **4027.8**
$81.94.5

N. B.—The *principal* is found in *dollars* in the upper line **1000, 2000, 3000,** etc., and the *interest* below in *cents;* units of cents under units of dollars, tens of cents under tens of dollars, etc., etc. Experiment with the section given, and see, for example, that on the single line opposite **28** days interest can be found, true to half a cent, on any principal from **$1** to **$9999.**

"365 DAYS TO THE YEAR" TABLE.

The habit of computing interest for days on the basis of 360 days to the year has become almost universal, and "One Page—One Rate" Tables are computed on that basis. As a rule, wholesale houses and banks keep in the office a set of Tables compiled on the basis of 365 days to the year, so that when called upon to pay interest or allow discount on bills of merchandise paid before the due day, they may not be obliged to adopt the computations of their friends, who generally compute interest on the 360 basis, and they thus avoid, in the first instance, paying too much interest, and, in the latter case, allowing too much discount. The following Table obviates the necessity of keeping Tables for such purpose, and is in fact much preferable, on account of its extreme conciseness, unapproachable simplicity and infallible accuracy.

N. B.—*This Table can be lawfully obtained only in this publication, but as it would be an easy thing for an unscrupulous person to print it, if such an act of piracy should come to the knowledge of any person who may read these lines, he is requested to notify the publisher, who will find some means of reciprocating the favor.*

EXAMPLE 1.—If your interest on a given principal, for a given number of days at a given rate per cent, computed on the basis of 360 days to the year, or taken from "360 day" Tables is **$755.97**, what is the true interest which would have been found by using "365" Tables, or by making the computations on that basis?

Opposite **700** find **$690.41.1**
56 " 55.23.3
Add the cents .97.

$746.61.4

EXAMPLE 2.—The interest (360 basis) on **$900** for 192 days at 10 per cent is **$48**, what would the interest be on the "365" basis?

Opposite **$48** find **$47.34.2**

EXAMPLE 3.—The interest (360 basis) on **$8000** at 6 per cent for 312 days is **$416**. What is it on the basis of 365 days?

$400 360 interest = $394 52.1
16 " = 15.78.1

$410.30.2

Note that in the first example the cents being over 50, tabular interest was taken for 56 instead of 55 dollars.
